

Eos 3.0.0 Build 389, Library 3.0.0.107

Monitor in portrait orientation at 1080 x 1920

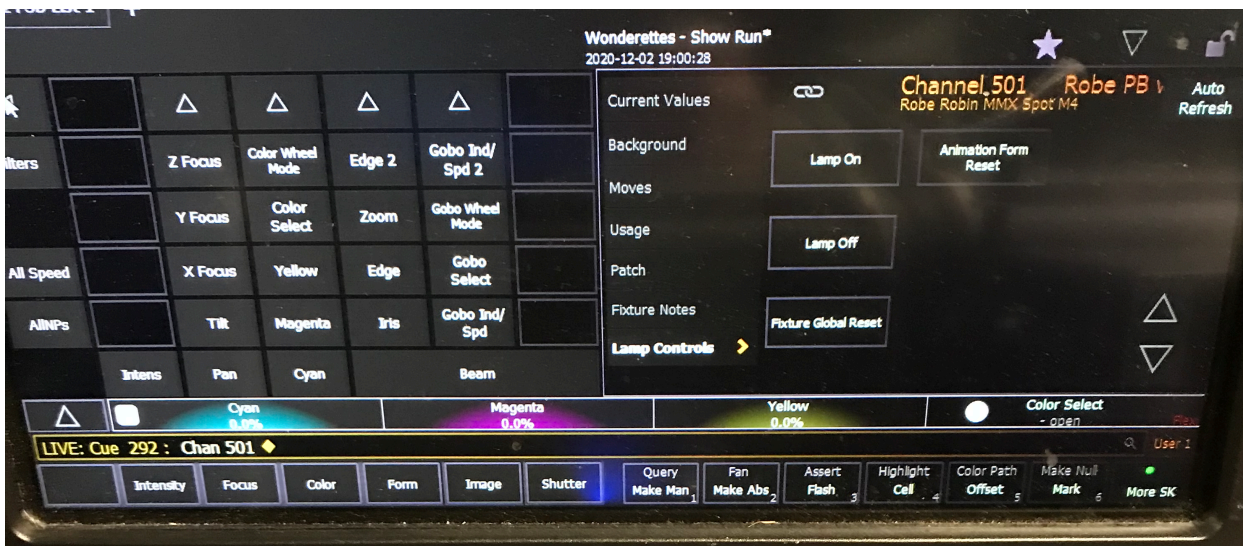

moving light channel About > Lamp Controls does not show controls

Collapsing parameters shows all controls

Expanding parameters shows start of controls but up/down arrows do not function

In Eos 2.9, this worked correctly when About > Lamp Controls was selected and up/down arrows functioned as expected
