## Declaration

This product has passed the final check for both functionalities and package when delivered from the factory. All users should observe the instructions and pay attentions to the warnings covered by this manual. Unreasonable damages resulting from unintended operations or not heeding instructions covered by this manual will void the warranty. Specifications in this manual intend for reference only, the fixture delivered takes the priority. Any future modification pertaining to content of this manual, there will be no particular notifications. FINE ART reserves all .

To obtain the latest information about software update, hardware and other files, please visit FINE ART online website.

# 1. Safety information

The following symbols are used to identify important safety information on the product and in this manual:

						
<b>DANGER!</b> Hazardous voltage. Risk of severe or lethal electric shock.	<b>DANGER!</b> Safety hazard. Risk of severe injury or death.	<b>DANGER!</b> Refer to manual before installing, powering or servicing.	<b>Warning!</b> Fire hazard.	<b>Warning!</b> Burn hazard. Hot surface. Do not touch.	<b>Warning!</b> Risk of eye injury. Safety glasses must be worn.	<b>Warning!</b> Risk of hand injury. Safety gloves must be worn.

					
For indoor use only	Do not direct lens to sun ray or strong light!	Do not actuate during operation	Replace any cracked protective shield	Minimum distance from lighted objects (metres)	Rated maximum ambient temperature

## WARNING!

Read the safety precautions in this section before installing, powering, operating or servicing this product.

After receiving the fixture, please unpack and check if there is any damage due to transportation. If any obvious damage or flaw is found, do not put it into use and contact the distributor or manufacturer as soon as possible.

This fixture is intended for professional use only. When operating the fixture, attentions should be drawn to fire/electric-shock hazards and lethal injuries caused by fall.

Read this User Manual before mounting and energizing the fixture. Observe the safety guideline and notice the warnings both in this User Manual and on the fixture. Yet any safety concerns not covered hereby, contact the distributor or service hot-line.

### Protection against over heat

FINE 1200C STROBE LED is suitable for indoor environment; its protection rating is IP20.

The fixture should be kept dry and avoid working in presence of moisture, over-heat or heavy smokes.

$t_a = 40^\circ\text{C}$

The natural working temperature should be lower than 40 degrees. If the ambient temperature exceeds 40 degrees, please stop operating the unit immediately.

## Protection against explosion

Protection screen must be replaced if they have become visible damaged to such an extent that their effectiveness is impaired.

## Protection against injury due to falls

To inspect that the structure and the truss hooks are in good condition and can bear about 10 times the weight of the fixture.  
Ensure the cover and all riggings are securely fastened, safety wire is necessary to use as a secondary attachment.  
Block access below the working area and work from a stable platform while installing, servicing or moving the fixture.

## Protection against electrical shock

All connections or maintenances must be performed by a qualified person with technical certificate.  
Make sure that the mains power supply you use is up to local construction and electronic code regulation, the over-load protection reliable earthing is essential.  
Each fixture must be grounded correctly, and be installed according to related regulation.  
Disconnect the fixture from mains supply before replacing any fuse.  
Avoid using the fixture in damp environment.

## Protection against burning or fire

Do not attempt to bypass the thermostat switch or fuse.  
Replace defective fuses with specified ratings only.  
Keep flammable materials far away from the fixture. Minimum distance from the flammable materials is 0.5m.  
Under the steady working state, the max temperature of exterior surface of FINE 1200C STROBE LED is 60°C , Please don't touch the moving head during movement.

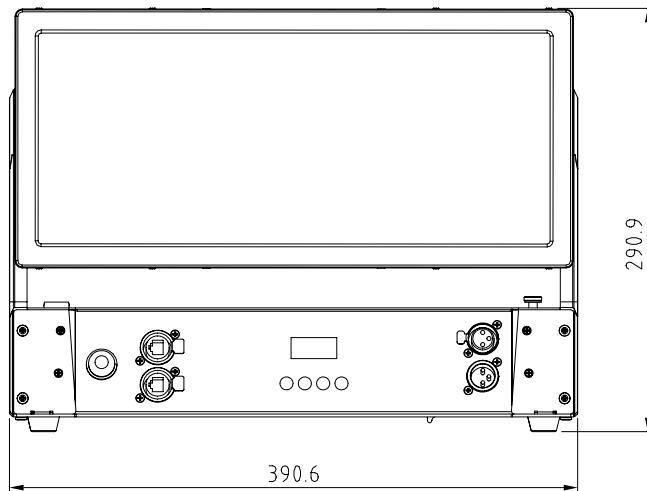

The minimum distance between the fixture and the lighted objects is 0.5m.  
Ensure a minimum clearance of 0.1m around the cooling fans and ventilations  
Do not place any filter or other object onto the optical lens.  
Do not revise the fixture or install any parts not from GUANGZHOU CHAIYI LIGHT CO.,LTD.

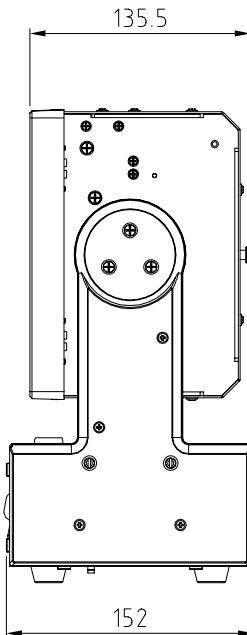

## 2. Product introduction

### 2.1 Fixture profile dimension

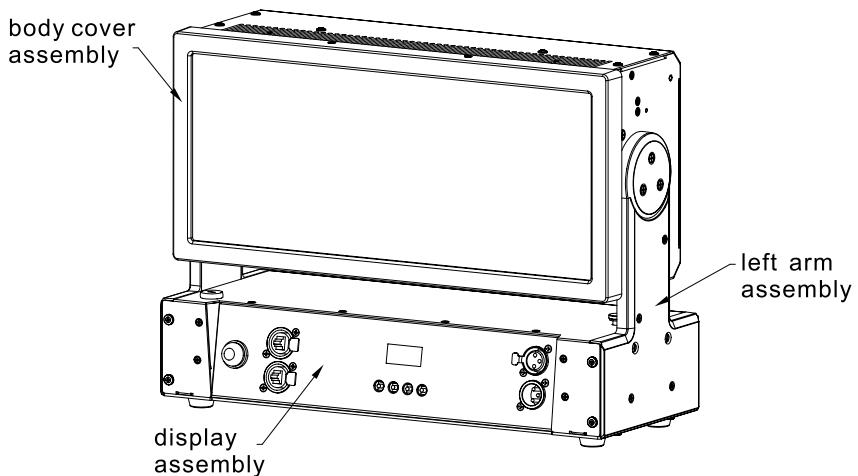

- Front view

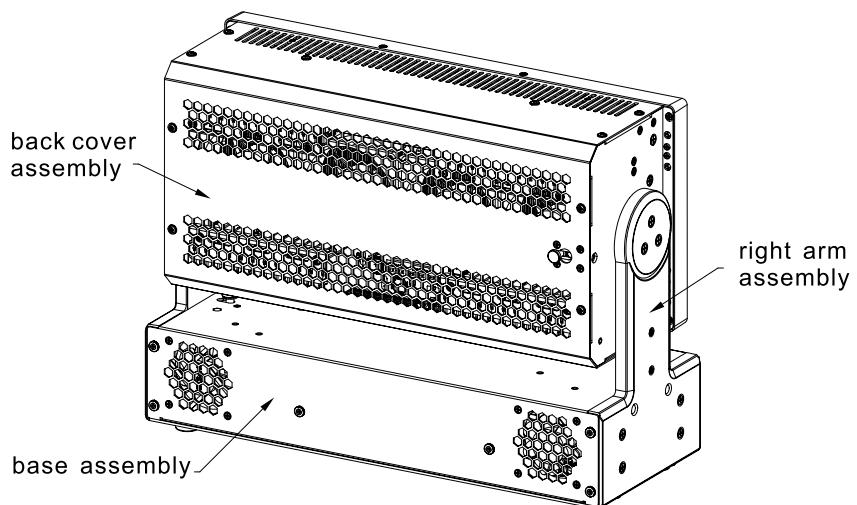

- Side view

## 2.2 Fixture introduction

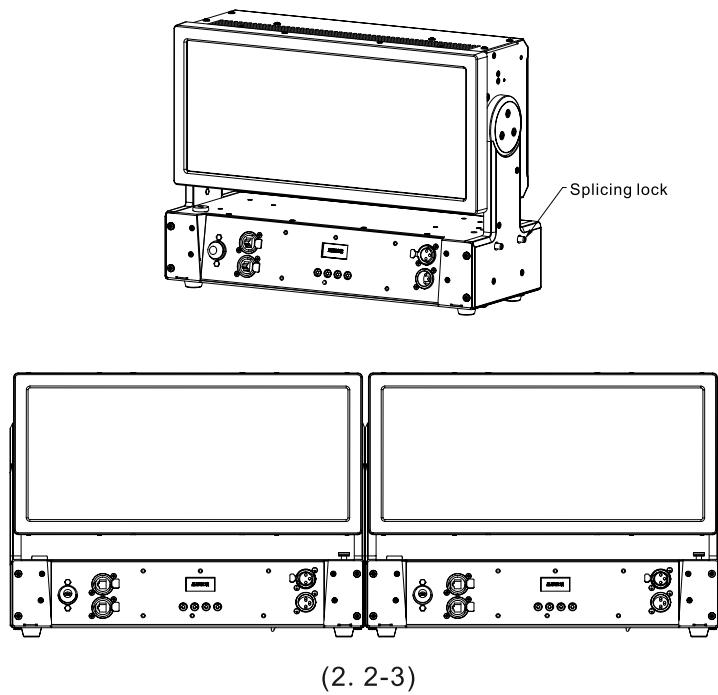

(2. 2-1) Front view

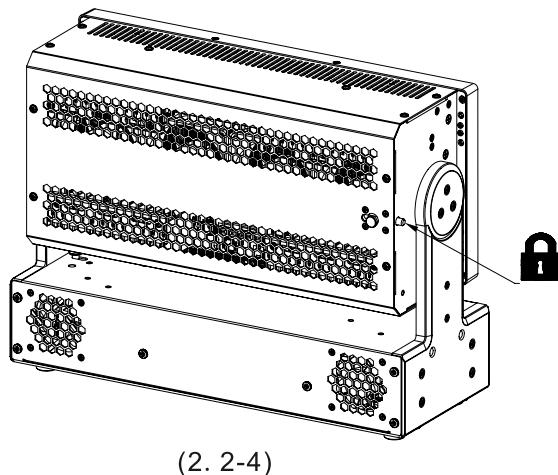

(2. 2-2) back view

The two fixtures can be connected together by pressing the movable push-board component on the base, shown as Fig 2.2-3:

Tilt-axis is equipped with a protective lock for the convenience of transportation, shown as Fig 2.2-4:

### 3. Package & delivery

FINE 1200C STROBE LED is packed with flight case. One single standard flight case carries four fixtures. Included items listed below.

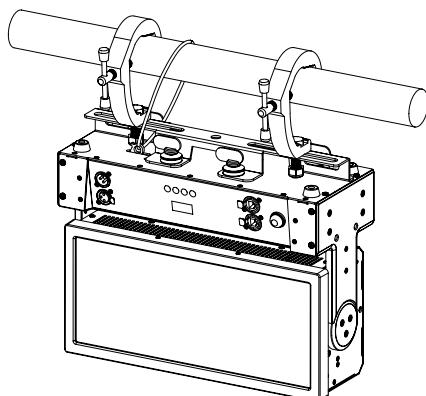

Accessories	QTY	UNIT
clamp module	2	PCS
fuse	2	PCS
safety rope	1	PCS
signal wire	1	PCS
User manual	1	PCS
Warranty card	1	PCS

### 4. Installation

User must be termly check the fixture and its install materials, if you are non-qualified to check that, please contact the professional person. Wrong installation will result in fatal hazard.

The fixture working ambient temperature are between -10°C-40°C, When ambient temperature over the range, don't operate the fixture. When the fixture are in installation, teardown, remove or servicing, don't stand under the fixture. Operator must be insure the fixture are safely connected. The input power supply must match the specific type demanded by the fixture. Make sure the installation check annually by professional person. The fixture of light source shall be replaced by the manufacturer or service agent or someone with similar qualifications.

Hang on the truss with clamps, please add one safety rope after the fixture is hung on the truss

## 5. Data link

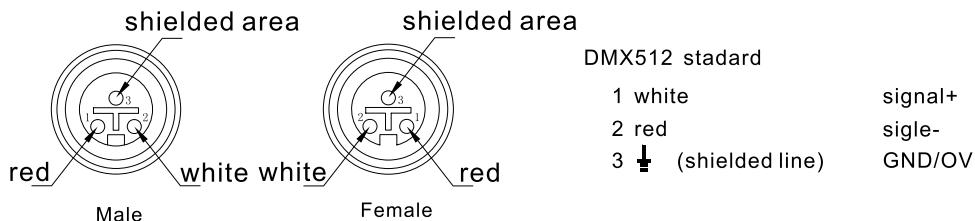

Note: The signal cable is type X connection.

Type X connection—if the external flexible cable or cord of this fixture is damaged, it shall be replaced by a special cord or cord exclusively available from the manufacturer or his service agent.

3-pin XLR or 5-pin XLR connectors are provided for fixture DMX input and output.

Pin 1 is for minus signals, pin 2 is for plus signals, and pin 3 is for earthing.

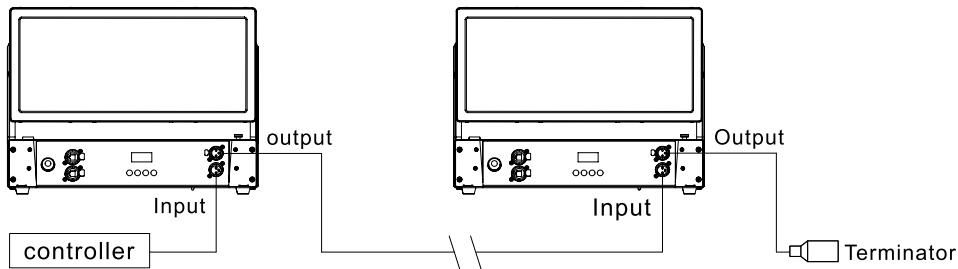

To prevent and absorb the reflection and interference of the signals, each data link must be ended by a respective terminator.

Connect the 3-pin or 5-pin output of a lighting controller to the 3-pin or 5-pin input of a first fixture on the link, then connect the 3-pin or 5-pin output of the said first fixture to the 3-pin or 5-pin input of a second fixture. Similarly, repeat the above connection step and end the data link with a plug-in terminator. Shown as Fig. 5.1-1 below.

If long-distance data transfer occurs, a DMX512 signal amplifier is necessary.

The added amplifier is inserted between the lighting controller and the first fixture on the basis of a normal data link.

### Notice:

1. No more than one signal input or output can occur in one fixture.
2. Don't split a data link via output ports on the fixture, use a DMX512 signal amplifier instead, if necessary.
3. Use only shielded-pair cables, and standard microphone cable is not reliable for long-distance data transfer.

## RJ45 Connection

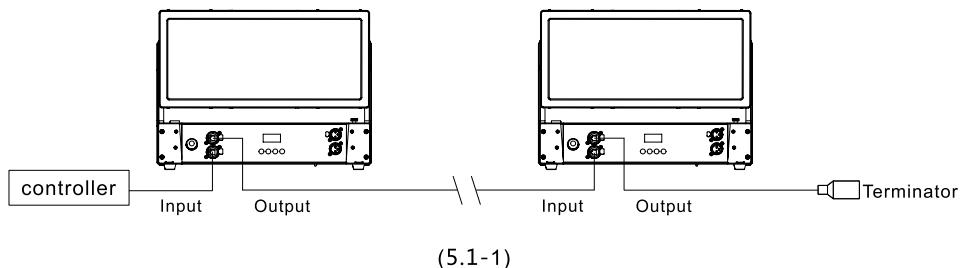

Note : The signal cable is type RJ45 connection

RJ45 connector is provided for fixture RJ45 input and output. The RJ45 socket uses a standard 568A network cable connection. That supports 10M/100M/1000M data connection. The built-in switch can adapt to speed.

Connect the RJ45 connector of a lighting controller to the RJ45 connector of a first fixture on the link, then connect the RJ45 connector of the first fixture to the second fixture . Similarly, repeat the above connection steps and end the data link with a plug-in terminator. Shown as Fig.5.1-1 below.

If long-distance data transfer occurs, a network switch is necessary. The added network switch is inserted between the lighting controller and the first fixture on the basis of a normal data link.

(5.1-1)

### Notice:

1. No more than one signal input or output can occur in one fixture.
2. Don't split a data link via output ports on the fixture, use a network switch instead, if necessary.
3. Please use the CAT5/CAT6 network cable. The length of the network cable should not exceed 100m.

## 6. Power Connection

Notice: Type Y attachment for power supply connection.

Method of attachment of the cable or cord such that any replacement can only be made by the manufacturer, his service agent or similarly qualified person.

The person must have the relevant qualification to connect the power supply. The AC power voltage shall be suitable to the fixture provided with over-loading or creepage protection.

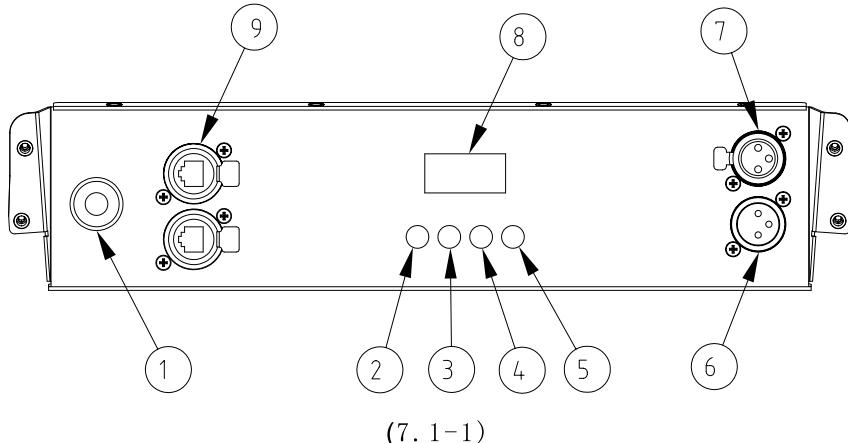

Connecting the equipment to the power supply, do not connect to silicon boxsystem, or else, it will destroy the equipment. The fixture is provided with standard 3-pin socket. Please according to table 6.1-1 connect to power supply, Yellow/green line must be earthed. If you still have any question to the installation, please consult with the experienced electrician.

Color	Wire	Mark
Brown	Live	L
Blue	Neutral	N
Yellow/Green	Earth	( $\ominus$ )

## **Shortcut:**

1. When the lighting is off, pressing the menu button a 2-3S to activate the battery.
2. Pressing the menu button and down button together to reverse the screen display.
3. At the main interface, press the up button to enter the address setting, and press the down button to enter the manual control.
4. Screen flashing indicates no signal input or error. This function can be closed in backlight warning.

## **8. Technical Feature**

### **■OPTICAL SYSTEM**

White Light Source: 10W x 180 pcs LEDs, 6500k

Color Light Source: 0.2W x 1000 pcs LEDs, RGB three in one

Light source life ≥ 50000 hours

The initial luminous flux and efficiency: 58898 lm, 61.28 lm/W

### **■EFFECT EQUIPMENT**

The flash part in the middle of fixture head is divided into 10 sections, each section can be controlled independently, while running water flash beam effect can be achieved. And the two sides are both backlight parts which is divided into 40 sections, each section can be controlled independently, and can be used as a pixel embellishment effect.

All optical domain dimming, 65536 grades dimming accuracy, high light output.

Fast strobe 1-25 Hz

Color macro and color gradual change effects

94 kinds of color and 21 kinds of white built-in effects

### **■MOVEMENT PARAMETER**

Tilt 182°, Precision 0.94°/Step, Precision Fine=0.0037°

### **■CONTROL AND PROGRAMMING**

Control Channel: Stand 23/RGB 138/SIMP 16/RGB8+130

Protocol: Standard DMX512, ArtNet, sACN

DMX Signal Connection: 3-pin/5-pin XLR input/output for option, RJ45 input/output(built in switch)

Menu display: 1.3 inches OLED display, resolution ratio: 128 x 64;

Chinese and English languages can be switched freely; menu available to display 180°reversely;

Key operation

### **■ELECTRONIC CONTROL TECHNOLOGY**

Fixture reset by menu or console controlling

0-100% dimmer

Setting of dimming curve

Constant current drive mode

Temperature sensor detection, intelligent adjustment for light source power  
DMX channel level monitoring  
Fixture information query  
Intelligent fan adjustment  
RDM data bidirectional transmission  
Built in charging LiMH battery, then the menu can be edited without power

## ■ELECTRIC

100-240V~ 50/60Hz

Input Power: 1250W

PF $\geqslant$ 0.98

## ■WORKING TEMPERATURE

Temperature: -10°C~40°C

Humidity: 5%-95%

## ■DIMENSION AND WEIGHT

Fixture Dimension:

391mm ×152mm×291mm

Package Dimension:

1100mm ×600mm×495mm (flight case)

450mm×280mm×500mm (carton)

Net Weight: 11 kg

Gross Weight: 21kg

## ■PACKAGE

4pcs /flight case

1pc /carton

## ■INSTALLMENT

Direction: any

Hanging: standard handing

Safety: safety rope

## ■IP RATE

IP20

# 9. Control Channel

## 10. Parts Code

Item	Specification	P/N
1. 2V NiMH battery	1920mWh, 1600mAh	130702000016
Three-phase stepping motor 17HE7104-24B	Temperature resistance: 130°C; Current: 1.6A/phase	140103000026
Fan ME60152V1-000C-A99	24V/0.115A	150101000034
Fan ME80252V1-000C-A99	DC24V/0.073A	150101000083
Toughened glass	Dimension: 364X157X3	200730000004
Hanging assembly		230730000040
1.3-inches OLED screen	Resolution ratio: 128*64	280802000049
Power supply	Vin:100-240VAC; Out1:36Vdc/16.7A; Out2:70Vdc/8.57A	330001200096
P/T optocoupler board	Version A	330397200005
Hall sensor board	39*31mm, Version A(V3.0)	330711100046
3-pin DMX board	Version C, 56.00mm*30.50mm, 3in1	330730100069
Signal main board	Version B, 333.0mm*45.0mm, 2in1	330730100065
Display board	Version C, 170.0mm*60.0mm, 3in1	330730100068
Ethernet network board	Version A, 50.0mm*48.0mm, 3in1	330730100070
White driver board	Version A, 48.5mm*34.0mm, 8in1	330730100059
Colors driver board	Version A, 48.5mm*34.0mm, 8in1	330730100067
Upper board of colors	Version A, 378.0mm*70.0mm, 1in1	330730100062
Below board of colors	Version A, 378.0mm*70.0mm, 1in1	330730100061
White LED board	Version A, 174.0mm*45.0mm, 2in1	330730100071
Controller switch board	Version A, 54*50mm, 6in1	330712100099

\*Name: refer to the names in the fixture exploded view.
